

STAINLESS STEEL HOSPITAL UTENSIL & MEDICAL WARE

Diverse surgical stainless steel products for patient care

The Liberty® branded stainless steel ware is made from a high quality genuine stainless steel 18-8 (304) specifically manufactured for surgical products with seamless construction that prevents bacteria growth and allows products to be cleaned with ease.

Manufacturing premium grade stainless steel hospital utensils and medical equipment that meets the most exacting requirements of medical and healthcare professionals worldwide. The medical grade stainless steel is a highly corrosion and rust-resistant alloy. The metal is extremely strong and durable and, more importantly, has a characteristic ability to form protective layers.

The Liberty® range of stainless steel hospital holloware includes steel trays for different purposes, buckets, lids, kidney dishes, bowls, cups, jugs, jars, instrument holders and bed pans, etc. are preferred in steel. These products are manufactured using seamless technology which eliminates areas that can harbour bacteria growth.
