**Daily solution the SASCI will provide you  
and your sterilisation department!**

## **Q. Is it a pass or fail?**

A. It takes the guess work out of the analysis. The SASCI technology analyses each indicator to determine if it is a pass or fail. If the load is a pass, then it can safely be released, thus reducing production delays.

## **Q. Can I get instant retrieval of archive results?**

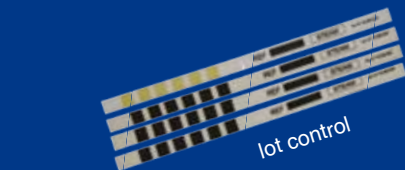

A. The SASCI stores all results and they can be retrieved on demand in either screen or printable format. This is likely to save retrieval costs from storage facilities.

**SASCI has the ability to interface  
with computer tracking systems**
