

SAFETY GLASSES

Safety glasses or goggles are a form of protective eye wear that usually enclose or protect the eye area in order to prevent particulates, water or chemicals from striking the eyes. Safety glasses should be worn to prevent flying particles from damaging the eyes.

With excellent optical quality, these quality safety glasses are ideal for doctors and all medical personnel. They offer great eye protection with the side shields and a wide field of vision and offer UV protection to 400 nanometers. With an adjustable temple arm offering positive locks you can achieve a comfortable face hugging fit.
